Detection aircraft 57096 was diverted and reported the fire at 3 acres, burning in mixed black spruce and hardwoods. It had 2 foot flames and was 50% active, with single tree torching & 3-5 mph winds out of the west. ASM A-4 (902AK), T-46, T-51, and Helitack 827MS responded. 6,000 gallons of retardant were dropped on the fire as well as bucket drops from 827MS. The fire was last reported as 5 acres with no estimate of containment due to heavy fuels & an extensive brush understory. A Type II Crew has been ordered for delivery 7/29.

	Narrative: The fire made a two mile run to the south toward Utah creek with crowning and long range spotting. Other portions of the fire held and are still in limited suppression. The fire spotted east over Mission Creek south of Cripple Creek and is well established. During the next operational period, crews will continue to hold and mop-up Division X, work on opportunities to hold the fire on the ridge between Excelsior Creek and Mission Creek on the northside of the fire. Tough terrain and a lack of water sources will significantly hinder control efforts on portions of the fire. With drier conditions returning crews will have a hard time checking the fire spread in Division W.
